GENERAL INFORMATION

Investment objective

The UCITS' investment objective, over the duration of the recommended investment period, is to outperform its benchmark by investing in Eurozone companies, combining financial profitability with the implementation of a policy aiming to respect sustainable development criteria.

Edmond de Rothschild Asset Management (France)'s SRI approach

Socially Responsible Investing (SRI) is an investment approach whereby portfolio stocks are selected by combining analytical criteria relating to environmental, social and corporate governance issues (ESG) with traditional financial criteria. Edmond de Rothschild Asset Management has chosen to develop an original and integrated approach that reconciles its financial convictions with major extra-financial challenges in the search for long term performance. To do this, an SRI management and analysis team with complementary profiles relies on a rigorous and transparent process for selecting companies and applies an ESG filter to its initial investment universe.

Monthly comment

October saw a sharp drop in European equity markets and a resurgence in volatility. Among the highlights, a rise in the number of profit warnings accompanying the quarterly earnings reports testifies to the spread of macro risks to the micro-economic sphere. On the political front, Italian sovereign risk has continued to dominate the news. While the ratings agencies seem to have granted a reprieve to the Italian government, the latter has begun a tug-of-war with the European Commission, which has rejected its draft budget. As a result, Italy's 10-year bond has continued to climb above 3%. Turning to the economy, monetary conditions are becoming increasingly restrictive on both sides of the Atlantic, while doubts are emerging over the course of world growth and the impact of the trade war launched by the United States—all of which are beginning to show through at the corporate level. The quarterly earnings reports have come out in tandem with numerous profit warnings, some heavily sanctioned, and not even sparing a number of well-valued growth stocks. Returning risk aversion has triggered very noticeable sector rotation in favour of the most defensive sectors. Over the month, we sold our position on Gestamp, given the difficulties facing the automotive sector as a whole. We also strengthened our exposure to large-cap financials by introducing ABN Amro, and strengthening Deutsche Telekom (telecommunications) and Iberdrola (utilities). This Spanish electricity utility is preparing a big leap forward in the field of renewable energy in the United States, which will require an investment of around €25 billion. The company, through its subsidiary Avangrid, currently has an installed capacity of 6,600 MW and boasts a project portfolio that should allow it to triple its current capacity to over 20,000 MW.

EDMOND DE ROTHSCHILD ASSET MANAGEMENT (FRANCE) ISR RATING METHODOLOGY

The SRI team conducts an analysis of stocks from the investment universe, the MSCI EMU and certain European stocks, based on predetermined ESG sub-criteria. The weighting of these criteria varies primarily in accordance with challenges within the sector and specific company-related issues. The main ESG analysis criteria used are shown in the table below:

MAIN ANALYSIS CRITERIA**Environment (E)****Environmental risk management**

- Introduction of environmental management system
- Integration of risks linked to climate change
- Respect for biodiversity

**Social (S)****Human Resources management**

- Quality of employment
- Career management and training (GPEC)
- Training and diversity
- Attractiveness
- Health and safety management

**Governance (G)****Business ethics and fundamental rights**

- Respect for human rights and child labour rights
- Fight against corruption and anti-competitive practices
- Fiscal transparency
- Responsible lobbying

Green innovation and impact of products

- Environmental added value of products or services, innovation
- Eco-design products

**Societal impact**

- Employment management and restructuring
- Supplier relations
- Social added value of the product or service
- Licence to operate

Structure of the Board

- Independence of the Board of Directors and committees (audit, remuneration...)
- Separation of powers
- Diversity of the Board and the Executive Committee

**Environmental footprint**

- Greenhouse gas emissions
- Energy consumption
- Water consumption
- Waste management
- Refusals

**Customer relations**

- Information and security of products and services
- Customer satisfaction

**CEO and Executive Committee**

- Structure and management of the Executive Committee
- CEO profile and succession
- Transparency and adequacy of remuneration

**Shareholders**

- Audit and internal control
- Consideration of minority interests

Each stock is given an internal ESG rating by Edmond de Rothschild Asset Management (France). In order to determine this ESG rating, the management team performs an in-depth, fundamental analysis which is supplemented by meetings with management personnel from each company. The team uses estimated quantitative and qualitative data from companies, non-financial rating agencies, brokers, etc. Each stock is assigned a rating on a seven-grade scale from CCC to AAA. Only the best stocks, rated AAA, AA or A, are held in the portfolio. The ratings are revised dynamically.

and/or on the following website (<http://funds.edram.com>), in order that investors analyse the risks and build their own opinion, independently from any entity of the Edmond de Rothschild Group. Investors are invited to request the opinion of their Legal Counsel where necessary, to ensure the suitability of the investment with regards to their financial situation, experience and investment objectives.

In Belgium, periodic reporting are available from the financial provider CACEIS Belgium. The Net Asset Value is available on the Belgian Asset Managers' Association, BEAMA site (www.beama.be).

If the sub-fund is not authorised but has appointed a representative : With regard to Switzerland, please note that the subfund mentioned in this document has not been approved by the Swiss Financial Market Supervisory Authority (FINMA) and therefore may not be distributed to the public in Switzerland or from Switzerland. This document is purely informative and is subject to all reserves. It is exclusively aimed at qualified investors as per Art. 10 Para. 3, 3bis and 3ter of the CISA.

The numerical data, comments and analyses in this presentation reflect the opinion of Edmond de Rothschild Asset Management (France) with respect to the markets and their trends, regulation and tax issues, on the basis of its own expertise, economic analyses and information available as of today. The figures mentioned refer to past years. Past performance and ratings are not indicative of future performance and ratings. Past performance can be misleading. The value of units or shares of funds and the returns are subject to fluctuation, and investors may not get back the full amount invested. Performance data is calculated on a dividend reinvested basis. These performances do not take into account the fees and expenses collected on the issue or redemption of shares/units, or taxes levied in the client's country of residence.

The fund's investment policy does not necessarily anticipate a correlation between the fund and the mentioned benchmark. As a result, the performance of this UCITS may differ from that of the benchmark.

Morningstar ratings should not be considered as recommendations to buy, sell or hold units of the this UCITS above-mentioned.

The Morningstar rating applies to funds with at least three years of history. It takes the Fund's subscription fees, risk-free returns, and volatility into account in order to calculate each fund's MRAR ratio (Morningstar Risk-Adjusted Return). The funds are then ranked in descending order of MRAR: the top 10 percent receive 5 stars, the following 22.5% receive 4 stars, the next 35% 3 stars, the following 22.5% 2 stars, and the final 10% receive 1 star. The funds are classified within 300 European categories.

If a specific tax treatment is applicable to the fund, investors should be aware that the tax treatment depends on the individual circumstances of each investor and may be subject to change in the future.

The information in this document regarding this UCITS is not intended to replace the information in the full prospectus, or the partial prospectus if the cited subfund is authorised for distribution in Switzerland, the annual and semi-annual report. Prior to making any investment decision, the investor therefore has an obligation to read it.

This document is only for information and does not represent an offer to buy or a solicitation to sell; the basis of any contract or commitment; a financial, legal or tax advice. No part of this document should be interpreted as investment advice. Regulations related to fund marketing may vary from one country to the next. This UCITS may be marketed in a jurisdiction other than that of its country of registration, in particular under the private placement regime for qualified investors, when the law of that other jurisdiction authorizes it. If you have the slightest doubt about marketing requirements for this UCITS, we invite you to contact your usual adviser.

No UCITS can be offered or sold to persons, or in countries or jurisdictions where such offer or sale would be unlawful.

United States: The fund and its shares are not registered under the Securities Act of 1933 or any other US regulation. Its shares may not be offered, sold, transferred or delivered for the benefit of, or on behalf, of a US National, as defined by US law.

Switzerland: Note that the sub-fund mentioned in this document has not been approved by FINMA for distribution to non-qualified investors. This document is intended only for qualified investors according to par. 10 sec. 3, 3bis and 3ter CISA.

In accordance with current local regulations, the UCI, or the class of the UCI, have received marketing authorization to specific institutional investors, or more broadly to qualified or professional investors in the following country(ies): **Singapore**

Created and supported by the French Ministry of Finance and the result of extended dialogue with stakeholders, the public SRI label aims to make socially responsible investment (SRI) products more visible to savers in France and Europe. The SRI label is awarded for a period of three years following a strict allocation process carried out by specially accredited third-party organisations. Fund labelling audits are performed independently in accordance with the standards defined by ministerial decree.

Belgian investors, if subscribing to a UCITS under French law, must be supplied with a declaration of dividends and interest received by the fund, and which must be included in their tax return.

To enable the investor to calculate this amount, we have developed an app that allows him/her to obtain the result required for the tax return, which is available on the www.edram.be website.

This app does not constitute tax advice and does not exempt investors from performing the checks and verifications required as taxpayers. The result is obtained from the data the investor enters into this app. The Edmond de Rothschild group cannot be held responsible for any errors or omissions on the investor's part.

(2) In connection with Article 19 bis of the Belgian Income Tax Code 1992, Belgian investors will be required, when redeeming units (mutual funds) or shares (SICAVs), to pay a withholding tax of 27% on the interest received, on the capital gains or losses and on the returns from assets invested in debt securities. This withholding tax only applies to UCIs that hold more than 27% of their assets in debt securities.

(3) The Belgian investor shall not bear any fees as part of the redemption of the Fund's units.

Any fees owed to the Belgian tax authorities are for information only and are not intended to be a substitute for tax advice. The tax treatment depends on the individual situation of each customer and does not absolve the Belgian investors of performing the checks and verifications necessary of a tax professional.

EUROZONE EQUITY - SRI FUND

EDMOND DE ROTHSCHILD ASSET MANAGEMENT

EUROPEAN EQUITY

MORNINGSTAR™ Ranking as of 30/09/2018 in the category Eurozone Large-Cap Equity : ★★☆☆

Fund size : EUR 117,45 mil.

DEFINITIONS

The **PERFORMANCE**, often expressed as a % makes it possible to measure the capital gain or loss of an investment over a period (10% = gain of 10 units for every 100 invested). Performance can also be expressed per annum. This is equivalent to extrapolating the performance of a fund over any period to a one-year period. In either case, a loss is indicated by a negative percentage and a gain by a positive percentage.

The **VOLATILITY** of a security is the difference between performance and average performance and therefore makes it possible to gauge the consistency of performance obtained. It comprises a measure of risk. If this is zero, the individual performances are identical. The higher it is, the greater the difference between individual performances.

The **TRACKING ERROR** shows the volatility of a fund's relative performance against that of its benchmark. It shows the difference between performances and their average and so makes it possible to gauge the consistency of relative performance. The lower the tracking error, the closer the fund's performance is to that of its benchmark.

The **INFORMATION RATIO** represents the relative performance obtained by the fund manager for each agreed volatility point in comparison with the benchmark. To some degree, it is this measurement that makes it possible to establish whether the additional risk taken by the fund manager is, in comparison with the benchmark, rewarding or otherwise.

The **ALPHA** corresponds to the fund's average performance. More specifically, it measures the fund managers' added value while cancelling out market influence, which cannot be controlled. This measure is expressed as a percentage.

The **SHARPE RATIO** shows the fund's outperformance against a zero-risk interest rate (the Eonia, in this case), adjusted for fund volatility.

The **BETA** measures the market's influence (represented by a benchmark) on the performance of a fund. It shows the average variation of the fund's NAV, for each variation of 1% in the benchmark. If beta is 0.8, this means that for each 1% movement in the benchmark, the fund moves 0.8%.

The **CORRELATION COEFFICIENT** defines the direction and degree of dependence between two variables. It ranges from -1 to +1. Positive correlation means that the benchmark and the fund move in the same direction, negative correlation means that they move in opposite directions. When correlation is close to zero, the benchmark's influence on the fund is very low.

The **R2** or the **DETERMINATION COEFFICIENT** measures to what extent variations in fund performance are explained by variations in the benchmark. Mathematically, it is the square of the correlation coefficient. It always has a value of between 0 and 1.

The **GAIN FREQUENCY** represents the percentage of positive returns for a defined frequency.

The **MAX GAIN** represents the maximum return recorded from a series of periodic return payments.

The **MINIMUM RETURN** is the maximum loss recorded over a series of periodic returns.

The **PAYBACK PERIOD** measures the time required to recover the maximum drawdown. It is often expressed in days or months. Payback begins with the return paid following the maximum loss.

The **PE = Price Earnings**. This ratio is equivalent to the ratio between the price of a share and the earnings per share. It is also known as the Earnings Capitalisation Multiple. The result is the weighted average of the PE of the securities in the portfolios.

The **VAR EPS = Variation in Earnings Per Share**. The result is the weighted average of the VAR EPS of the securities in the portfolios.

The **PCF = Price to Cash Flow**. This is the ratio between the price of a share and the cash-flow generated per share (Cash flow per share). The result is the weighted average of the PCF of the securities in the portfolios.

The **PBV = Price to Book Value**. This ratio is equivalent to the ratio between the price of a share and the book value of its equity. The result is the weighted average of the PBV of the securities in the portfolios.

The **PEG = Price Earnings Growth**. This is calculated by dividing the PE by the average growth rates for expected profits in future years.

The **YIELD =** This ratio is the ratio of dividend per share and share price. The returns are gross before deduction of taxes and shall take into account tax credits, if any. For example, for French and German companies, tax credits are included. In Singapore and Malaysia, the company returns are based on net dividends after corporate taxes. For a fund, the performance equals the weighted average yields of all portfolio holdings which have seconded a dividend. This ratio is expressed in % per year.

OVERLAY MANAGEMENT is an approach based on the hedging of existing risks (equities, interest rate, currency, etc.) in a portfolio.

UCITS means "Undertaking for Collective Investment in Transferable Securities". This category of financial products includes the Mutual Fund (FCP) and the Société d'Investissement à Capital Variable (SICAV).

UCI means "Undertaking for Collective Investment". This category of financial products includes the Mutual Fund (FCP) and the Société d'Investissement à Capital Variable (SICAV). There are two categories of UCI, namely UCITS "Undertakings for Collective Investment in Transferable Securities" and AIFs "Alternative Investment Funds".

SICAV (Société d'Investissement à Capital Variable) means open-ended investment company with variable capital.

FUND means "Mutual Fund".

SRI label: The SRI management process is based on stock selection ESG undergoing analysis. This analysis uses weighted ratings by criteria (Environmental, Social, Governance) which essentially vary depending on sector issues, the size of the company and the nature of capital. Annual labeling is achieved by an external firm with the management company certifying that the management company meets the prerequisites ISR.

PEA ELIGIBLE: Eligible fund Savings Plan in Action. This measure depends on the individual situation of each client.

MORNINGSTAR™ Ranking as of 30/09/2018 in the category Eurozone Large-Cap Equity : ★★☆☆

Fund size : EUR 117,45 mil.

RISK SCALE

Risk and reward profile

Synthetic risk/return indicator ranks the fund on a scale from 1 to 7 (1 being the less risky ranking, 7 being the most risky ranking). This rating system is based on average fluctuations in the fund's net asset value over the past five years, i.e. the scale of changes in the index securities, both up and down. If the net asset value is less than 5 years old, the rating is determined by other regulatory calculation methods. Historic data such as those used to calculate the synthetic indicator may not be a reliable indication of the future risk profile. The current category is neither a guarantee nor an objective. Category 1 does not signify a risk free investment. For more details on the methodology of the ranking, please consult the key investor information document (KIID) of the fund.

This fund is rated in category 5, reflecting that it can be up to 110% exposed to equities markets, which presents a high risk/reward profile.

METHODOLOGY

(a) Carbon Footprint :

Our carbon measures rely on the data supplied by the companies and updated annually (annual report, Carbon Disclosure Project) or estimated by third-party data providers (Bloomberg). We then produce several indicators calculated as follows:

Carbon Footprint (in tonnes of CO2 equivalent per million euros invested):

It measures the volume of greenhouse gas (GHG) emissions for which the portfolio is responsible in proportion to its capital share. If an investor holds 1% of a company's market capitalisation, they are responsible for 1% of that company's emissions (in tonnes of CO2 equivalent).

Company Share = (price*number of shares held) / Market capitalisation

Absolute Carbon Footprint = $\sum(\text{Company Share}(i) * \text{Company Emissions}(i))$

Carbon Footprint = Absolute Carbon Footprint / Fund Net Assets

Carbon emissions include Scope 1 + Scope 2

Scope 1 emissions: direct emissions of greenhouse gases (fuels, refrigerant fluids, fuel for vehicles owned)

Scope 2 emissions: indirect emissions (electricity, steam purchase)
