Why invest in ESG via this fund?

Differentiating approach

Mix of leaders reinventing themselves and innovative companies improves the risk/reward profile.

A potential for performance and resilience

A high-conviction mindset through proprietary research, in which our stock-picking discipline aims to identify companies that should create value for all stakeholders.

2°C alignment

One of the few generalist ESG funds already aligned with the Paris Agreement.

Our purpose

Our investment approach is, in our opinion, **a major factor of resilience** to market volatility and geopolitical instability.

We aim to select companies offering:

- ▶ **Attractive financial growth prospects over the long term**
- ▶ **High extra-financial quality, assessed through our “Best-in-Universe” ESG analysis process.**

Our approach

Our approach based on the selection of quality stocks, both financial and extra-financial, allows investors **to participate in opportunities arising from structural growth shifts such as:**

- ▶ Energy efficiency
- ▶ Upcycling (water, wastes, ...)
- ▶ Human capital (job quality, human resources management, ...)
- ▶ Healthcare
- ▶ Security

Investment team

A recognised SRI player for over 10 years: A highly experienced investment team, fueled by unique insights from internal experts on macroeconomic, thematic, and ESG (+26 years' experience in average for the RI team and in-house ESG rating system developed since 2011).

Main investment risks

RISK INDICATOR:

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The risk indicator rates this fund on a scale of 1 to 7. This indicator is used to assess the level of risk of this product in comparison to other funds and a category 1 rating does not mean that the investment is risk free. In addition, it indicates the likelihood that this product will incur losses in the event of market movements or our inability to pay you.

This indicator assumes that you hold the product until the end of the recommended holding period of this fund. The actual risk may be very different if you choose to exit before the end of the recommended holding period of this Fund.

The risks described below are not exhaustive.

Risk of capital loss: The UCITS does not guarantee or protect the capital invested; investors may therefore not get back the full amount of their initial capital invested even if they hold their units for the recommended investment period.

Discretionary management risk: The discretionary management style is based on expectations of the performance of different markets (equities, bonds). However, there is a risk that the UCITS may not be invested in the best-performing securities at all times.

Equity risk: The value of a stock may change depending on factors specific to the issuer but also on exogenous, political or economic factors. The UCITS may be exposed to the equity markets either via direct investments in equities and/or via financial contracts and/or UCITS. Fluctuations of the equity markets may lead to substantial variations in the net assets which may have a negative impact on the performance of the UCITS.

Risk related to SRI (Socially Responsible Investment) selection: The selection of SRI securities may cause the UCITS to deviate from the benchmark indicator.

Fund characteristics*

Investment Objective: to outperform its benchmark, the MSCI EMU Index, by investing in eurozone companies, combining financial profitability with the implementation of a policy that aims to respect non-financial criteria. Its investment strategy also takes climate issues into account and aims to align the portfolio's climate trajectory with the Paris Agreement, over the recommended investment period.
